Josh Loriel L. So

Software Engineer — Frontend & Full-Stack Web Development

Iloilo City, Philippines • +63 936 903 2114 • joshlorielsoo@gmail.com

PROFESSIONAL SUMMARY

Software Engineer focused on modern frontend development, user interface optimization, and full-stack web architecture across enterprise and public-sector environments. Currently building full-stack features for smart-factory enterprise platforms at EasyGeo Co. Ltd., with prior experience delivering client-side production web applications at KaChick and municipal document tracking and emergency reporting systems for the Iloilo City Government. Combines strong proficiency in modern frontend technologies with a solid foundation in backend architecture, relational and cloud databases, and system integration.

TECHNICAL SKILLS

Frontend Development	JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, jQuery
Backend & AI Integration	Node.js, PHP, Java, Spring, AI API Integration, AI-Powered Chatbot Development
Databases & BaaS	PostgreSQL, MySQL, Microsoft SQL Server (MSSQL), Firebase, Supabase
Tools, Design & Agile	Git, GitHub, GitLab, Figma, Canva, Trello, Asana, Kanban, Microsoft Office

PROFESSIONAL EXPERIENCE

Full-Stack Engineer | **EasyGeo Co. Ltd.** (Korean Technology Company) — **Jan 2025 – Present**

- Drive the full-stack development of the **WorkStudio** web platform, an enterprise system supporting smart-factory operational frameworks including ERP, MES, SPC, POP, PLM, and SCM.
- Engineer and integrate frontend user interfaces and backend application features to support scalable manufacturing workflows and cross-module system integration.

Software Engineering Intern | **KaChick** (Hong Kong–Based Startup) — **2024**

- Contributed to the client-side development and frontend engineering of multiple production web platforms, including **trackbill.io**, **Solomon (slom.ai)**, and **KaChick Photospots**.
- Focused on user interface implementation, responsive frontend optimization, and interactive client-side functionality across web products.

Junior Programmer | **Iloilo City Government** (Iloilo City, Philippines) — **2023 – 2024**

- Contributed to the development, maintenance, and continuous enhancement of a municipal **Document Tracking Web Application** to streamline the routing and monitoring of official records while resolving operational issues promptly.
- Collaborated on creating an **Emergency Patient Report System** to improve incident documentation workflows and the handling of emergency cases.
- Developed the **Iloilo City Informal Settlers Database** to digitize, centralize, and manage community housing and demographic records.
- Delivered technical support and end-user training across municipal web applications to ensure smooth system adoption and effective daily utilization.

EDUCATION & ACADEMIC PROJECTS

Bachelor of Science in Information Technology | **PHINMA University of Iloilo** — **Graduated 2024**

Rizal Street, Iloilo City, Iloilo, 5000

- **Capstone Project — Jianzin E-Commerce Website** *(Advisor: Ryan Valeriano)*: Developed a web-based e-commerce platform to facilitate online customer transactions, showcase product catalogs, and streamline order management.
